SAFETY ALERT

Good afternoon, All

We have recently commenced with works on Avenue de Chartres to form the new Zebra crossing. While I appreciate that the footpath closure and pedestrian diversion is an inconvenience to many people going about their daily business, may I please remind you that the diversion is in place for a reason. This is to ensure that we have provided pedestrians a safe place to cross the road away from our working area.

We have had on more than 10 occasions in the first week of the works where members of the public have chosen to ignore the signage and have walked around the outside of our work area in the carriageway. This is extremely unsafe, and in fact puts our groundworkers at unnecessary risk along with themselves.

If anyone who has mobility issues or disabilities – hidden or visible – require assistance in crossing the road to a safe place to get around our road works, please do not hesitate to reach out to one of our groundworkers or myself for assistance – we will be happy to help you cross the road safely.

Kind regards

Dan Rose – Site Manager – Mildren Construction LTD
